PREETHI A R

Software Engineer | QA & Test Automation | Python Developer

Bengaluru, India | +91 7676809743 | preethiaraiml2026@gmail.com
linkedin.com/in/preethiar1226 | Portfolio: preethireddy-12.github.io

PROFESSIONAL SUMMARY

Software engineer with a B.E. in Artificial Intelligence & Machine Learning (CGPA 8.9) and industry experience on a live, AI-enabled Order Management System (OMS). On the quality side, performs functional, API, integration, security, performance and end-to-end testing with Playwright, Postman, JMeter, OWASP ZAP and Lighthouse. On the development side, builds Python applications using Generative AI, Machine Learning and Computer Vision, backed by SQL/PostgreSQL. Works closely with developers in Agile sprints using Git and GitHub, and brings a tester's eye for edge cases to writing reliable, well-validated code.

TECHNICAL SKILLS

- **Programming:** Python (OOP, debugging), SQL, HTML
- **Development & AI:** Generative AI / LLM applications, Prompt Engineering, Multimodal AI, Machine Learning, Computer Vision, Data Analytics
- **Testing & QA:** Functional, API, Integration, End-to-End, Security, Performance, Feature & Regression Validation, Bug Reporting, Test Documentation
- **Test Tools:** Playwright (E2E automation), Postman (REST APIs), JMeter (load), OWASP ZAP (security), Lighthouse
- **Databases & Cloud:** PostgreSQL, SQL, Cloudflare
- **Tools & Practices:** Git, GitHub, VS Code, Agile / Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

Intern – Software Testing & Development | *Electrobtech Innovations Pvt. Ltd., Bengaluru* **Jun 2026 – Sep 2026**

- Contributed to an AI-enabled Order Management System (OMS), owning testing, validation and verification of new features before release.
- Tested REST APIs and service integrations with Postman, validating request/response contracts, error handling and data flow between the application and its PostgreSQL-backed services.
- Built and ran end-to-end test suites with Playwright and load tests with JMeter to verify functional correctness and performance under concurrent usage.
- Ran security scans with OWASP ZAP and audits with Lighthouse, reporting vulnerabilities and quality issues to support secure releases.
- Assisted with Cloudflare configuration and platform setup for deployment of the application.
- Worked with developers in Agile sprints on bug reporting, debugging, fix validation and documentation, using Git and GitHub for version control and reviews.

PROJECTS

GenAI Multimodal AI Prototype | *Python, LLMs, Generative AI, Prompt Engineering*

- Built a Python application that uses generative AI to process text, documents, images, audio and video within a single interface.
- Designed and iterated prompts for each input type, testing outputs to improve relevance and consistency across modalities.

Medical Scribe – Top 6 Finalist, Docathon (Cell Verse) | *Generative AI, Healthcare*

- Built an AI-assisted medical scribe solution; placed in the top 6 finalists at the Docathon.

Video Sentiment Analysis | *Python, Machine Learning*

- Developed an ML pipeline to classify customer video reviews as positive or negative, turning unstructured video feedback into actionable insights.

Sign Language Recognition System | *Python, Computer Vision*

- Implemented hand detection and gesture recognition to convert sign language into readable text in real time.

EDUCATION

B.E., Artificial Intelligence & Machine Learning | *The Oxford College of Engineering* **2022 – 2026**
CGPA: 8.9/10 | Smile Foundation Scholarship (sponsored by Deutsche Bank)

Class XII – 85.33% | *Krupanidhi Pre-University College* **2021 – 2022**

Class X (ICSE) – 88.33% | *Mahatma Vidyalaya* **2019 – 2020**

CERTIFICATIONS & ACTIVITIES

- Gen AI Exchange Academy – Google Cloud & H2Skills
- Google AI Studio – Google Cloud
- Volunteer, NSS Unit, The Oxford College of Engineering
